

THE ORIGINATOR OF CORAL CALCIUM
SINCE 1963 – OKINAWA, JAPAN

SANGO MINERAL POWDER

The natural coral grains, harvested from the ocean floor off subtropical Okinawa, contain naturally balanced calcium and magnesium, as well as other essential trace minerals. SMP is a natural coral mineral powder with an ideal Calcium to Magnesium ratio of 2:1 that can be applied to nutritionally fortify various processed foods.

SPECIFICATION

Calcium	20% or more
Magnesium	10% or more
Arsenic	3 ppm or less
Lead	0.5 ppm or less
Pesticide residue	Undetectable

Micro Organisms	
General Bacteria	3x10 ³ /g or less
Yeast & Mold	1x10 ² /g or less
Coli bacillus	Negative
Salmonella	Negative

Available particle size :

- SMP-44 44 μ 90% pass (wt.%)
- SMP-08 8 μ 90% pass (wt.%)

FEATURES

- Calcium and Magnesium contained in an ideal balance of 2:1 from a single natural source of coral
- Tasteless, odorless, white micro-powder
- A 100% natural product derived from fossilized coral in Okinawa, Japan

APPLICATIONS

- As a food additive, to nutritionally fortify various processed foods with natural minerals of Calcium, Magnesium and other trace minerals.

PACKAGING

- 20kg Kraft 3-tiers bag
